DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "e.g." renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d). The examiner assumed the limitation to be "displaying one panel".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Alessi et al.

("Alessi", Pub. No.: 2004/0025034).

Per claim 1, Alessi teaches a method in a computer system for displaying comic books, and graphic novels on all sizes of electronic display screens, comprising the steps of:

Art Unit: 2174

displaying one panel (fig. 5; [0016]);

generating text balloons based on the text of the balloon (fig. 9; [0011]; [0017]);

sizing the text balloons based on the text of the balloon and a predetermined font type and font size selected from a group consisting of font types and font sizes that are legible for the size of the display area on which the panel and balloons are drawn ([0055]; [0060]).

Per claim 2, Alessi teaches the method of claim 1 wherein said panel is scaled to fit the size of the display area on the screen ([0054]; using “+” or “-” to zoom in or out).

Per claim 3, Alessi teaches the method of claim 1 wherein the position and sizing of said text balloons is further determined by the size of the display area on screen, a balloon tail type, and a balloon tail origin point ([0017];[0059];[0060]).

Per claim 4, Alessi teaches the method of claim 1 wherein the visibility of said text balloons can be toggled ([0017];[0059];[0060]).

Per claim 5, Alessi teaches the method of claim 1 wherein only one of the said text balloons is shown on screen at a time ([0017];[0059];[0060]; only one enlarged text balloon is displayed when the cursor is placed over the text balloon).
